

ISHIMWE Daniel

Brussels, Belgium

Email: daniel.ishimwee@gmail.com

LinkedIn: <https://linkedin.com/in/daniel-ishimwe-k>

Cyber Security Engineer

Technical Skills

Systems Administration: Linux, Windows, MacOS, Active Directory, system hardening, access control, patch management, technical support

Virtualisation & Infrastructure: VMware, VirtualBox, Vagrant, IBM Power Systems, FlashSystem, Storwize, infrastructure monitoring, high availability

Networking: DNS, basic network administration, connectivity troubleshooting, log analysis

Cybersecurity: incident investigation, vulnerability assessment, secure configuration, cryptography fundamentals, CTF analysis

Programming & Automation: Python, Java, JavaScript, PHP, C, C++, Bash scripting

Databases: MySQL, PostgreSQL, MongoDB, MariaDB, Redis

Professional Experience

IT Specialist

2023 – 2025

KU Leuven – COSIC, Belgium

- Automated repetitive tasks using PowerShell scripting, improving efficiency and reducing manual errors.
- Implemented and maintained network infrastructure for research services, ensuring high availability and security, which improved system reliability
- Provided advanced technical support in Linux and Windows environments
- Diagnosed infrastructure issues and implemented corrective actions
- Maintained critical systems supporting research services and online voting platforms
- Conducted security validations, access control reviews, and system integrity checks
- Supported virtualisation operations and infrastructure reliability

Electronic Billing Machine IT Officer

2020 – 2023

Rwanda Revenue Authority, Rwanda

- Supported systems and resolved incidents related to tax collection software
- Managed databases and validated data integrity
- Investigated incidents and proposed corrective measures
- Assisted end users and technical teams

Systems Engineer

2019 – 2020

Mitra Systems, Malawi

- Implemented and managed Microsoft 365 administration and SQL databases to enhance system performance and data integrity in operational efficiency
- Maintained enterprise Linux systems and IBM infrastructures
- Monitoring, upgrades, and preventive maintenance
- Supported virtualisation and high-availability systems
- Diagnosed technical incidents and restored service continuity

Junior Software Developer

2014 – 2016

A to Z Technology Systems, Rwanda

- Developed internal software tools and automation scripts
- Supported system improvements and process automation

Other Experience

CyberSecurity Challenge Belgium Finals – 2nd place	2026
CyberSecurity Challenge Belgium	
1st in BelgiumGrad – SANS NetWars Skills Quest (Core Edition)	2026
SANS	

Education

Master's in Cybersecurity	2023 – Present
Université Libre de Bruxelles, Belgium	
Bachelor in Computer Applications (Great Distinction)	2016 – 2019
Parul University, India	
Recognised in Belgium by the Fédération Wallonie-Bruxelles and NARIC-Vlaanderen	
CompTIA CASP Training	2018
Cybrary	
Cisco CCNA Training	2018
Cybrary	

Languages

French – Strong proficiency (C1)
Dutch – Intermediate (B1)
English – Fluent

About Me

Driver's licence: B
GitHub: <https://github.com/danishimwe>
